

Antenna RAGLJA is an antenna that makes quality reception of horizontal/vertical TV DVB-T/T2 signals possible even in areas with bad reception conditions. The antenna can be upgraded with the antenna amplifier AMO45, supplied with power supply directly from the antenna socket on the digital receiver. The set includes impedance transformer with F connector.

TECHNICAL DATA:

Band:	IV-V, 470-862 MHz
Channels:	21-69
Max. gain (dB):	14,5
Front/back ratio (dB):	>28
3 dB Beamwidth H/V:	20°/23°
Length (mm):	995
Packing:	10 pcs/cardboard box or 100 pcs/palette
